**Fortune 500 Company Works with Malone Building Solutions to Construct New Store
New Advance Auto Parts to be Located in Belleville's Hottest Retail Region**

March 15, 2006: O'FALLON, IL— Advance Auto Parts, an automotive aftermarket retailer, is working with Malone Building Solutions to construct its Belleville, IL store at 924 Carlyle Ave. The O'Fallon, IL-based design-build firm began construction March 1, 2006 and anticipates completion on June 1, 2006.

Marty Malone, Vice President of Malone Building Solutions, notes that the store's location will benefit the City of Belleville as well as its residents. "Since Advance Auto Parts will be located in the east end of Belleville, it will heighten the popularity of this retail region while serving nearby residents," Malone said.

The construction site was the former location of Tent Land. Developers for Advance Auto Parts purchased the site from Tent Land's owners because of its good visibility on Carlyle Ave., which is one of Belleville's higher traffic count thoroughfares. To make room for Advance Auto Parts, Malone Building Solutions demolished the former Tent Land on February 13, 2006 after the company ceased operations on February 1, 2006.

"Our total approach to design-build ensures that we'll complete Advance Auto Parts according to the highest standards of quality, scheduling and cost effectiveness," Malone said. "This project illustrates our dedication of helping quality businesses expand into the Metro East."

Advance Auto Parts, Inc. is based in Roanoke, Virginia and is the second-largest automotive aftermarket retailer in the United States, based on sales and store count. It is a member of the Fortune 500.

Malone Building Solutions, founded in 1976, is an innovative company that specializes in both the design and building aspects of commercial construction. The full-service firm provides a "Concept to Completion" approach that ensures seamless project delivery. For more information on Malone Building Solutions, please visit www.maloneco.com.
