**FOR IMMEDIATE RELEASE**

**Malone Building Solutions Improves School's Safety, Accessibility**  
Firm to Complete Renovations at Bowling Green School by Mid-August

July 26, 2006: O'Fallon, IL— When the academic year begins at the Bowling Green R-1 School District, students will have an up-to-date facility. Malone Building Solutions, an O'Fallon, IL firm, began renovations on June 1 to improve the facility's life safety and indoor air quality, as well as to achieve compliance with the Americans with Disabilities Act (ADA).

Marty Malone, Vice President of Malone Building Solutions, notes that the firm received the contract based on its past experience with school renovations. "Our firm has earned a reputation for completing projects ahead of schedule," Malone said. "This is especially important for school renovations because it prevents disruptions in the classroom environment."

Malone Building Solutions anticipates completing the renovations on August 15, 2006. The building houses the district's elementary school, middle school and high school. The Bowling Green R-1 School District, which is located approximately 20 west of Hannibal, awarded the contract to Malone in March 2006.

"Although the distance between our office and Bowling Green presents logistical challenges, our firm is working hard to complete the project in the set time frame," Malone said. "We want the students, faculty and staff to be able to enjoy their renovated building on the first day of school."

Malone Building Solutions, founded in 1976, is an innovative company that specializes in both the design and building aspects of commercial construction. The full-service firm provides a "Concept to Completion" approach that ensures seamless project delivery.
