FOR IMMEDIATE RELEASE

**Malone Design & Construction Wraps Up Renovation at Scott Air Force Base
Firm's Proposal is Deemed the "Best Value" to the Government**

August 25, 2005: O'FALLON, IL-- Imagine a control center that tracks air transportation for all of the U.S. military branches on a worldwide basis for the Department of Defense. This actual facility is known as the Tanker Airlift Control Center (TACC) and is located at Scott Air Force Base, Illinois.

Given the important function of the TACC, the government was very selective when it recently hired a design-builder to renovate the facility.

The prestigious honor and \$3.7 million contract went to Malone Design & Construction, based in O'Fallon, IL. The project was completed on August 22, 2005 ahead of schedule.

"The government awarded us the contract partially because we have past experience with this type of construction," said Marty Malone, Vice President at Malone Design & Construction. "We have worked diligently on this project, and we are very excited for its completion."

The firm designed and built Phases 1 and 2 for TACC, and is currently working on the administrative office area for the global tracking facility. Malone has installed many pieces of equipment into this facility, including a fully integrated multimedia screen with more than 500 square feet of viewing area.

Malone received the contract because its proposal was deemed as the best value to the government. This refers to Malone's efficiency with design-build, as well as its ample number of employees and solid management and leadership skills. The proposal Malone submitted numbered several hundred pages.

"Our vast amount of experience with complex facility projects not only qualified Malone Design & Construction for the project, but also allows us to complete the TACC renovation ahead of schedule," said Malone.

Malone Design & Construction, founded in 1976, is an innovative company that specializes in both the design and building aspects of commercial construction. The full-service firm provides a "Concept to Completion" approach that ensures seamless project delivery. For more information on Malone Design & Construction, visit www.maloneco.com.
